PROFILE

Senior Product Manager with 12+ years of experience across Android engineering and digital product ownership in UAE banking and fintech. Hands-on track record delivering SME and retail banking journeys onboarding, KYC, payments, cards, and account management at ADIB (1M+ users) and Astratech (Botim, 100M+ downloads). Experienced in cross-functional squad delivery, compliance-driven product development, and translating complex business and regulatory requirements into customer-facing digital products.

SKILLS

Product: Product Strategy & Roadmapping, Backlog Management & Grooming, User Stories & Acceptance Criteria, Feature Prioritization, KPI Definition & Tracking, Experimentation & A/B Testing, Go-to-Market & Feature Adoption.
Domain: Digital Banking & Payments, Retail Banking, KYC & Identity Verification, Onboarding Flows, Cards & Transaction Journeys, Compliance & Regulatory Delivery (CBUAE).
Technical: Android (Kotlin, Java), Dart (Flutter), Rust, Swift, API Integration (REST, JSON), Multi-Modular Architecture, CI/CD, Git, JIRA, Agile (Scrum),
AI Tools & Rapid Development: Claude(Sonnet/Opus), Cursor, GitHub Copilot.

WORK EXPERIENCE

Technical Product Owner | Astratech (Botim) | 2025 – Present

- Owned and shipped analytics-driven engagement and campaign features for Botim, a consumer super-app with 100M+ downloads, enabling targeted user interactions and data-informed product decisions.
- Drove cross-platform behavioral tracking integration across millions of active users, improving campaign targeting accuracy by ~30%.
- Defined product requirements, epics, and priorities based on user behavior, business KPIs, and technical feasibility.
- Identified and resolved critical product stability issues, reducing crash rates by ~25% and significantly cutting user-reported defects.
- Owned the full feature lifecycle from requirements to production, coordinating across product, backend, and QA teams to ensure on-time delivery.
- Leveraged AI tools including Claude and Cursor to accelerate PRD writing, requirement drafting, and delivery workflows.

Android Engineer -> Product Owner | Abu Dhabi Islamic Bank | 2023 - 2025

- Transitioned from Senior Android Engineer into product ownership, taking full responsibility for feature delivery and roadmap contribution.
- Owned end-to-end product delivery for SME and retail banking journeys including onboarding, KYC, payments, authentication, and account management.
- Delivered account creation and activation flows for Ghina Savings, Investment Deposit, Takaful, Mazaya, and Amwali covering full customer acquisition journeys.
- Groomed product backlog in Jira, writing epics, user stories, and acceptance criteria across onboarding, payments, and account management journeys.
- Partnered with compliance, engineering, and design teams to align delivery with CBUAE regulatory requirements and business goals.
- Identified friction points across user journeys, reducing onboarding time by ~30% across acquisition and transaction flows.
- Delivered secure payment journeys handling 100K+ daily transactions with biometric authentication and real-time financial computation.

Senior Android Engineer | Toggle Market | 2020 - 2023

- Owned end-to-end digital procurement workflows, building buyer-side purchase order and supplier-side invoice generation flows connecting 500+ buyers and suppliers on the platform.
- Drove structured cost estimation and material planning capabilities, reducing manual procurement effort by ~40% for hospitality clients.
- Gained broad exposure to end-to-end digital product delivery across multi-party transaction workflows, compliance, and user experience requirements.

Software Engineer Android | Multi Level Technology | 2016 - 2020

- Delivered POS payment applications across 800+ deployed devices handling 10K+ daily transactions across UAE government platforms.
- Integrated EMV payment SDK enabling Visa and Mastercard transactions via Swipe, Insert, and Tap (NFC contactless).
- Integrated payment gateways ensuring secure, reliable end-to-end transaction processing across Abu Dhabi Judicial Department, Dubai Taxi Corporation, and Dubai RTA.

EDUCATION

Sir Syed University of Engineering And Technology

Bachelor of Science in Computer Engineering 2010 - 2013
